*C4i Services is a Service-disabled Veteran-owned business*

### Bodyguard vs. Executive Protection

**Avoid Conflict.** Bodyguards attempt to protect you once an aggressor has made up his mind to make contact. C4i Services, as an Executive Protection Company, believes that protection begins much earlier. C4i Services intelligence analysts work with local intelligence authorities to gain a firm understanding of the “picture on the ground”. Threat detection specialists move covertly through crowds to find the “out of place” people or objects. Surveillance detection specialists “watch the watchers”.

**Be Ready.** Even though C4i expends large amounts of effort avoiding confrontation, it still happens and it is important that the appropriate response is utilized. C4i protection specialists are former military and law enforcement personnel who are experienced in meeting confrontation with the appropriate response.

**Complete Discretion.** You will never see the name or pictures of the personalities or business executives that we work with. As a C4i Services client, you can expect your business to stay your business.

**“The men at C4i are consummate professionals and the best at what they do. Their training and abilities shine through.....”**

**-Security Director, International Personality**
